LEO MINOR[®] MULTIPURPOSE LED

The innovative Leo Minor[®] multipurpose LED surgical light is available in four configurations to meet multiple application needs ranging from the surgical suite to the examination room. Available configurations include floor stand, wall mount, ceiling mount-single head, and ceiling mount-dual head.

CELESTIAL STAR[™] SURGICAL LIGHT

The Celestial Star[™] surgical light is ideal for surgical and exam room applications. The flexible design allows for easy angling and positioning. The space-saving structure of this state-of-the-art surgical light is ideal for many facilities including emergency rooms, surgical centers, trauma centers, and clinics. This light also comes in MRI-conditional format. ***LED coming soon**

ORION LED™

MULTIPURPOSE EXAM

The Orion LED is a sturdy medical exam light which delivers uniform and high-quality light output. It is ideal for examination rooms and hospital rooms. The bright, focused lamp provides for near daylight color rendition with reduced heat. Available with 10° or 25° optics. This light is dimmable.

HM SERIES

AVAILABLE IN LED

The HM Series of lights offers intense white light in a compact flexible design. The swivel joint lamp head allows 359° axial rotation and 90° angular adjustments. Available configurations include mobile as well as wall, table, or ceiling mount.

PF SERIES

EXAMINATION LIGHT

The PF Series high-intensity general exam light is flexible, durable, and easy to use. It is ideal for general purpose examinations. Choose from an articulated arm or flexible gooseneck models. Available configurations include ceiling mount, wall mount, direct mount, and mobile. The PF is also available in an MRI-conditional format.

The TriStar offers an economical alternative to traditional minor surgical or examination lights. It is ideal for use in environments where space is limited and multiple procedures are performed.

***LED coming soon**

TriStar

The SoloSpot is ideal for applications where a focused spot light is required. This light is perfect for direct attachment to medical equipment such as patient tables and chairs. Great for dental and orthopaedics.

Solo Spot

This magnifying light offers durability and performance in an economical package. It is ideal for detailed inspection during exams and procedures. Available configurations include C-clamp and mobile. Comes in 120V or 230V.
